* ROE is an important indicator, calculated as net profit / equity (= shareholders' equity), that measures the final profit secured using shareholders' equity.

As the average of term-end equity of 2 terms is used as the denominator, companies posting zero or negative equity during the relevant terms are excluded.

ROE for the latest quarter is calculated using estimated net profit for this term and shareholders' equity as of the end of the previous term and of the latest quarter.

Percentage from the Top	%	15.8	15.7	10.8	9.3	8.8	9.0

* ROA is calculated as Earnings before Interest and Taxes (operating profit + interest revenue + dividend income and interest on securities) / total assets. It is justifiable for a company to expand its business by financial leverage using debt, if the company's ROA exceeds the company's financing cost (e.g. cost of issuing 10-year corporate bonds = 2%).

Interest coverage ratio shown on P11 indicates the ratio of Earnings before Interest and Taxes to financial expenses (interest and discount expenses), with 10 times regarded as ideal.

If the interest coverage ratio holds a sufficient level with a high ROA and Profit Ratio of Sales, a company has no problem in financing aggressively.

As the average of term-end equity of 2 terms is used as the denominator, companies unable to be measured with the same standard are excluded.

ROA for the latest quarter is calculated using estimated operating profit for this term and total assets as of the end of the previous term and of the latest quarter.

Dividend Payout Ratio	%	35.2	34.1	29.1	33.0	30.5

Percentage from the Top	%	24.5	22.7	33.4	25.1	30.0	

* Dividend Payout Ratio is calculated as total dividend / net profit. It should be noted that it may differ from the figure announced by the companies calculated from profit per share according to the accounting principle.

Data for total annual dividend exceeding net profit and dividend of unprofitable companies are excluded from the rankings.

DOE	%	3.3	3.7	4.1	4.9	4.8

* DOE, calculated as ROE times the dividend payout ratio, can be called the "true dividend payout ratio", and is closely tracked by global investors.

Its inverse (1 / DOE) equals the period (year) to recover shareholders' equity via the dividend.

As the average of term-end equity of two terms is used as the denominator, companies posting zero or negative equity during the relevant terms are excluded.

Disclaimers on Overall Management Indicator

- All sectors in this report refer to the 29 sectors that are among the 33 sectors of the Tokyo Stock Exchange, excluding the 4 financial sectors (Banks, Securities and Commodity Futures, Insurance, and Other Financials) - which use different accounting standards - and all companies for which common shares were listed on the Japanese stock market as of the end of March 2017. In the calculation for Growth Potential, ROA, ROE, and other items, the companies analyzed total 3,326. Given that the earnings numbers for the most recent 4 fiscal years were used, about 70 companies were excluded in total as some companies had not released earnings results for the relevant terms or had posted zero or negative equity at least once, including 8 companies whose earnings data cannot be recalculated into reasonable figures based on Japanese accounting standards.
- The numbers used in this report for FY2017 are adopted in the following order of priority: (1) numbers in a company's earnings results; (2) company's forecasts; and (3) estimates by Spring. In the February 2018 report, estimates for FY2017 by Spring are used for 30 companies.
- This report is based upon calculations from February 2018. The calculations for aggregate FY 2017 data will be issued in June 2018.
- Overall Management Indicator (as scored by Spring) in this report represents an overall score, which is a composite of Growth Potential, Asset & Capital Profitability, Sales Profitability, and Sound Dividend Payout Ratio. The weighting for each category has been set at 30%, 25%, 20%, and 25%, respectively.
- Corporate earnings data in this report are owned by Spring, and some data have been verified with information vendors with which Spring has a contract for greater accuracy. However, Spring does not guarantee completeness of the information. The content of this report was valid at the time the materials were compiled and may change without prior notice.
