\* ROE is an important indicator, calculated as net profit / equity (= shareholders' equity), that measures the final profit secured using shareholders' equity.

As the average of term-end equity of 2 terms is used as the denominator, companies posting zero or negative equity during the relevant terms are excluded.

ROE for the latest quarter is calculated using estimated net profit for this term and shareholders' equity as of the end of the previous term and of the latest quarter.

<b>ROA</b>	%	14.3	14.5	14.8	14.3	15.5	12.3

<b>Percentage from the Top</b>	%	9.3	8.8	9.1	9.0	7.9	10.3

\* ROA is calculated as Earnings before Interest and Taxes (operating profit + interest revenue + dividend income and interest on securities) / total assets. It is justifiable for a company to expand its business by financial leverage using debt, if the company's ROA exceeds the company's financing cost (e.g. cost of issuing 10-year corporate bonds = 2%).

Interest coverage ratio shown on P11 indicates the ratio of Earnings before Interest and Taxes to financial expenses (interest and discount expenses), with 10 times regarded as ideal.

If the interest coverage ratio holds a sufficient level with a high ROA and Profit Ratio of Sales, a company has no problem in financing aggressively.

As the average of term-end equity of 2 terms is used as the denominator, companies unable to be measured with the same standard are excluded.

ROA for the latest quarter is calculated using estimated operating profit for this term and total assets as of the end of the previous term and of the latest quarter.

<b>Dividend Payout Ratio</b>	%	33.0	30.5	35.5	31.6	31.0	
<b>29 Sectors</b>	%	33.8	30.1	27.4	32.4	46.8

<b>Percentage from the Top</b>	%	25.1	30.0	16.9	28.2	33.5	

\* Dividend Payout Ratio is calculated as total dividend / net profit. It should be noted that it may differ from the figure announced by the companies calculated from profit per share according to the accounting principle.

Data for total annual dividend exceeding net profit and dividend of unprofitable companies are excluded from the rankings.

<b>DOE</b>	%	4.9	4.8	5.4	4.6	4.6	
<b>29 Sectors</b>	%	2.7	2.8	2.9	3.0	3.1

<b>Percentage from the Top</b>	%	6.6	8.3	6.1	10.2	10.7	

\* DOE, calculated as ROE times the dividend payout ratio, can be called the "true dividend payout ratio", and is closely tracked by global investors.

Its inverse (1 / DOE) equals the period (year) to recover shareholders' equity via the dividend.

As the average of term-end equity of two terms is used as the denominator, companies posting zero or negative equity during the relevant terms are excluded.

## Disclaimers

- This report has been prepared under a contract between CRESCO LTD. (hereinafter, the "Company") and Spring Capital Co., Ltd. (hereinafter, "SC") by SC. In the contract, the Company has consented that SC prepare this report based entirely upon the standards of SC only and excluding any intervention by the Company on all items, including the qualitative information, the management indicators adopted in the Management Indicator Ranking, and the classification of business sectors (or the Company's business sector) chosen for the comparison report.
- This report has been prepared so that companies can monitor objectively prepared rankings of management indicators and is not aimed at soliciting investment. Therefore, investment decisions or activities should be made or done solely based on the investors' judgements, and neither the Company nor SC are responsible for any investment or consequence.
- SC has not placed a restriction on the Company regarding the distribution of this report, but all intellectual property rights, including the copyright of the Management Indicator Ranking and all data associated with the comparison report, belong to SC. Consequently, other parties including the readers of this report are strictly prohibited from publishing, reproducing, disclosing, or using in any other unauthorized fashion (including via electronic media) this report, its data, and other materials included in this report without SC's permission.

## Disclaimers on Overall Management Indicator

- "All sectors" in this report refer to the 29 sectors that remain when the four financial sectors (Banks, Securities and Commodity Futures, Insurance, and Other Financials), which use different accounting standards, are excluded from the 33 sectors as defined by the Tokyo Stock Exchange, and consist of all companies whose common shares were listed on the Japanese stock market as of the end of March 2020. Since calculations of the Growth Potential, the ROA, the ROE, and other items use values from the full-year financial results of the most recent four fiscal years, the ranking excludes companies that did not announce full-year financial results and companies that had posted zero or negative equity at least once during the four-year period, as well as companies whose disclosed full-year financial results could not be recalculated into reasonable figures based on the Japanese GAAP and companies that had not been able to announce the financial results for FY 2019 by May 29, 2020. A total of 3,366 companies have been analyzed in the ranking.
- The values for FY 2020 used in this report have been adopted from one of the following sources in the order of decreasing priority: (1) the numbers in a company's disclosed financial results; (2) a company's forecast; or (3) estimates made by SC. In this current report based on Feb. 2021 data, SC's estimates for FY 2020 have been used for 108 companies.
- Going forward, the finalized ranking report for FY 2020 will be based on the values available as of May 2021 and will be published the following month.
- The Overall Management Indicator (scored by SC) in this report represents an overall score for the major categories (Growth Potential, Asset & Capital Profitability, Sales Profitability, and Sound Dividend Payout Ratio). The weighting for each category is 30%, 25%, 20%, and 25%, respectively.
- The intermediate and minor categories that compose each of the major categories are described on P4 and P5. For the minor categories, extreme values have been adjusted so that the highest and the lowest deviation values are 80 and 20, respectively. For the intermediate and major categories, no adjustment has been made since SC scored both categories based on the minor categories, but the average SC score for the major categories is 50 due to the repeated processing to seek deviation values.
- On P7-P8, a comparison is made for the Growth Potential, Sales Profitability, ROE, and ROA with the 29 business sectors and with the Company's sector as defined by the Tokyo Stock Exchange. The figures for ROE and ROA used in the comparison match those on P10. However, regarding the Growth Potential and the Sales Profitability, the figures do not match those on P9. This difference is due to the fact that, for the purpose of comparing the Growth Potential over the long term, the target companies for the comparison report have been limited to only those in the 29 business sectors and the Company's sector (as defined by the Tokyo Stock Exchange) that have continuously announced their full-year financial results from FY 2010 to FY 2019. Adjustment of the universe for the comparison of the Growth Potential is conducted every year in the finalized ranking report for the previous fiscal year that is based on the values available as of May.
- The data in this report on corporate financial results are owned by SC, and a part of the data has been verified for greater accuracy with information vendors with whom SC has a contract. However, SC does not guarantee integrity of its data. The contents of this report were relevant as of the time that this report was created and may change without prior notice.
